sensitive information	sensitive information	sensitive information

Request Information
Request Description
The system should enable moderators to perform essential moderation actions, including viewing, locking, and deleting posts. Additionally, moderators should have the ability to manage users by muting, kicking, and issuing warnings. Professional volunteers will have the authority to determine bans from among those who are kicked.
Justification
Empowering moderators with the capability to manage both posts and users is crucial for maintaining a healthy online community. These moderation tools enhance content control, user discipline, and overall community well-being by ensuring swift and appropriate responses to violations.
Effect if declined (Risk if the project request is declined)
The absence of moderation capabilities would compromise the system's ability to maintain a safe and organized environment. Without these features, the platform could be more susceptible to misuse, inappropriate content, and a lack of user discipline, potentially resulting in a decline in community trust and engagement.
Request Alternatives (if exists)

Request Review Information		
Review Date	Reviewer Name and Signature	Reviewer Conclusion
21.11.2023	Aykan Berk Ayvazoğlu sensitive information	<input checked="" type="checkbox"/> Approved <input type="checkbox"/> Declined <input type="checkbox"/> Postponed (D: )
