Request Information
Request Description
The system must have the capability to display posts categorized by topics. Users should be able to easily navigate and access posts based on predefined categories, enhancing the overall user experience.
Justification
Categorizing posts improves content organization and user engagement by providing a structured and easily navigable interface. This feature enhances user satisfaction and facilitates efficient access to relevant information.
Effect if declined (Risk if the project request is declined)
Without the ability to display posts divided by category, user experience may suffer due to difficulties in content navigation. This could lead to decreased user engagement, frustration, and a less effective dissemination of information within the system.
